

TENTEL Announces Betacam Heads

TENTEL (Placerville, CA) familiar to the Broadcast and Video Industry for providing accurate, easy to use mechanical test instruments and training programs for Betacam BVW, PVW, and DVW, now announces Betacam replacement heads. These rebuilt heads are made to exacting specifications similar to the high quality 'factory' heads available prior to 1992.

TENTEL believes these heads to be the highest quality available for head life and electronic performance. Since TENTEL also manufacturers and markets precision test instruments for allowing technicians to measure head tip protrusion plus an erect image 35X microscope to visually inspect and quantify video head quality; these heads can be customer verified to have the highest level of performance.

These refurbished heads have a 2 yr / 2000 Hour performance warranty. Current sample prices are: (please note: new heads and other transport parts from Panasonic AND Sony are also available at discount prices. Call or fax for quote)
